1 Ticket Index

Ticket Number	Short Description
2116	The Registration form now implements the optional password preference correctly.
1967	New menu option to ignore the patient that is showing as open.
2098	A popup warning is displayed when the total event summary upload exceeds a set size.
1980	A pop-up warning is displayed for excessive uploads in the pending queue. A menu item is available to manage the queue.
2092	Medical Director version v3.17 compatibility.
2105	Best Practice Lava version compatibility.
2072	Respiratory values included in Best Practice extract.
2044	When using statHealth the RecordConnect Consumer Registration form now correctly uploads the address details to RecordPoint.

See below for more details on each ticket.

2 General

**Optional
Registration
Password:**

The patient password was showing as mandatory on Registration even when the user preference to allow optional passwords was selected by the user.

(2116)

**Ignore Patients
Not Open:**

A new option has been added to the right-click content menu to allow the user to instruct RecordConnect to ignore the patient that is showing as open. The local clinical systems can mistakenly tell RecordConnect that a patient is open on the workstation when they are not. This option tells RecordConnect that this patient is not actually open and to continue with the other patients.

(1967)

3 Upload Form

Applicable to both the Initial Health Summary and Event Summary uploads.

**Upload Size
Warning:**

(2098)

A user preference has been added to display a warning when an upload exceeds a user specified size. The user may elect to proceed with the upload or to change the selected items to reduce the size. RecordConnect also now has a maximum limit of 350Mb per upload. An upload greater than 350Mb must be reduced by the user by removing selected items before the upload can proceed.

**Pending
Uploads
Warning:**

(1980)

RecordConnect will now display a warning to the user if pending uploads (ie uploads that have been previously requested but have not yet been uploaded over the internet) have been pending for greater than 2 days or the number of queued uploads is greater than 5. A right-click context menu item allows the user to manage the pending uploads if the queue is not making suitable progress.

4 Specific to Clinical Package

4.1 Medical Director

V3.17 Support: Compatibility changes to support differences when connecting to version v3.17.
(2092)

4.2 Best Practice

Lava Support: Compatibility changes to support Pathology report bodies from correspondence-in for the Lava version.
(2105)

Respiratory values: Respiratory values are now extracted and included in the upload observations.
(2072)

4.3 statHealth

Duplicate Addresses: The address details are no longer duplicated when registering a new Consumer.
(2044)
